Barker Road Non-motorized Pathway

Northfield Township, Washtenaw County

Client: Northfield Township
8350 Main Street
Whitmore Lake, Michigan
Mrs. Deb Mozurkewich—Supervisor
734.449.2880

Project Description

The Northfield was awarded a grant for the design and construction a non-motorized pathway which linked the Whitmore Lake Elementary School with several subdivisions to the east of the school. Boss Engineering was involved through the entire project; starting with the preparation of the Grant Proposal to the Washtenaw County Parks Department through construction administration. Portions of the path system crossed wetland areas. This required the design of a board in order to limit disturbance in these areas. The boardwalk required approval from the Michigan Department of Environmental Quality. There are a total of three phases for the project, which would eventually connect the school with the downtown Whitmore Lake area.
